Description

Basic information about the drug BosentasDescription BosentasOrder, delivery and payment Bosentas

Bosentas is a medicine that belongs to antineoplastic agents. It is used to treat pulmonary hypertension. Bosentas is an analogue of the original drug Tracleer. Manufacturer India, active ingredient - bosentan, 125 mg, international spelling in English Bosentas.

Bosentas: buy

Patients can buy Bosentas by contacting an online pharmacy. In order to clarify the availability of a medicine, call the hotline or contact our online consultants in a dialogue message on the website.

Bosentas price

The price of Bosentas is always favorable with us, since we are talking about a generic drug that has the same effect as the more expensive, original medicine. There is no doubt about the effectiveness of the therapeutic effect of Bosentas, since its clinical effect has been repeatedly confirmed by doctors and patients.

Bosentas Reviews

Within a few weeks after using the medicine, patients notice a significant improvement in their condition - provided that the medicine is used correctly, in accordance with the prescription of the attending physician.

Description

The form of Bosentas is white-orange film-coated tablets with engravings on one side.

The medicine should be taken twice a day, in the morning and evening. Food intake does not matter, but it is important to follow the schedule prescribed by the doctor. If necessary, correct it.

Indications for use

Arterial hypertension of the lungs. Purpose: to improve the endurance to physical activity in patients and to alleviate the clinical symptoms of the underlying disease. At the same time, the drug is used in both primary and secondary forms of pulmonary hypertension, including scleroderma, congenital heart defects and other hemodynamic disorders.

Bosentas: contraindications

Of the contraindications to the use of the drug, it should be noted:

- serious violations of the liver and kidneys;
- pregnancy and breastfeeding;
- taking the drug Cyclosporin A;
- low blood pressure;
- children and adolescence.

Individual allergic reactions are also a contraindication.
