Buy Efavirenz

You can buy Efavirenz by placing an order on the official website of our online pharmacy.

Efavirenz: the price of the drug

This drug is a generic drug that does not require too large costs and formalities for production, so its cost is much lower than that of the original drug. At the same time, the quality of the drug is in no way inferior to the original, and doctors recommend it to patients as a combination therapy.

Efavirenz: reviews

Reviews of the drug are positive, experts and patients note the high effectiveness of its effect already several weeks after regular use.

An anti-virus agent used as part of a combination treatment for HIV infection.

Description of the drug Efavirenz

The form of release of the drug - tablets in a film-coated, biconvex shape. Packages of 30 or 100 are available for sale, the dosage of each tablet is 600 mg. You can take them regardless of food intake, once a day. The best option in order to avoid unwanted side effects is to take the medicine shortly before bedtime.

Efavirenz: indications for use

Combined treatment of HIV infection of the first type.
