Buy GEFTINAT

The pharmacy sells this drug produced by the Indian company Natco. It is used in the treatment of small cell lung cancer. The drug is successfully used both in the initial stages of the disease and in the latter, as well as to support the patient's life. This medicine is prescribed and used strictly under the supervision of the attending physician. The use of the drug without the permission of specialists can be hazardous to health.

Price GEFTINAT

In our on-line pharmacy, the cost of drugs is significantly lower than in other pharmacies selling generics. This is achieved due to the fact that we sign direct contracts with drug manufacturers, so they come to us in this case directly from India. The pharmacy has all the necessary documentation for the drugs, so our clients should not doubt the quality of the generics supplied to them.

Reviews of the drug GEFTINAT

Indian pharmaceutical company Natco has long established itself as a first-class generic manufacturer. That is why all drugs produced by this company have all the necessary certificates and other documentation. The patients themselves note that improvement after taking GEFTINAT occurs literally after several applications of the drug. The main advantage of this drug is that it can be used even by elderly and very weak patients.

GEFTINAT

This drug from an Indian pharmaceutical company is supplied in the form of tablets, in a package of 30 pieces. GEFTINATE is prescribed only by the attending physician, self-medication with this drug is impossible. These pills are considered anticancer, and according to numerous positive reviews and studies, it can be said that the drug does indeed fulfill its tasks.

The action of the drug GEFTINAT

HEFTINATE has slow bioavailability. It is prescribed for locally advanced or metastatic lung cancer.

Application of the drug GEFTINAT

This drug is taken strictly according to the instructions of the attending physician. It is recommended to take 1 tablet every day, it is advisable not to allow gaps between doses. Only a specialist can reduce or increase the dosage of the drug.

Contraindications and side effects of GEFTINATE

The drug GEFTINAT is not prescribed for children (under 18 years of age), as well as for pregnant and lactating women. Side effects include diarrhea, bleeding, nausea, anorexia, stomatitis. Also, some of the wards complained of deterioration of vision and respiratory system. When using this drug, constant monitoring by specialists is required.

You can order in our online pharmacy in three ways - by filling out the reverse form on the website, filling out the order form yourself, or by writing a message in Viber. In any case, our employee will call you back in a short time to clarify and confirm the order. Also, our specialist can provide a free consultation, which is sold on our website.

In Moscow, St. Petersburg and Krasnodar, the order can be delivered by courier within 2 days from the date of ordering. Delivery to other cities is possible by Russian Post or EMS courier service.

In our online pharmacy, the customer first receives the order and only then pays for it. Such a system was introduced so that, before direct purchase, the buyer could check the expiration dates of the drugs and the condition of the packaging, whether it is broken, or whether the delivered goods are damaged. After that, if everything is fine, then the buyer pays for the order.
