Where to buy Hetgra?

The medicine Hetgra was developed in India by a pharmaceutical company with the world name Heet Healthcare. This medication is a high quality generic of the original Tivikay medication. The drug Hetgra is used to treat patients with the human immunodeficiency virus. Therapy with Hetgra is available both in monotherapy and in complex treatment to enhance effectiveness. Hetgre is sufficient to be in the patient's body and it immediately starts launching processes that reduce the high-quality viral load. Make an order on the website of our pharmacy and this will help you to profitably purchase everything you need. All drugs that you see on our portal are delivered to us by suppliers with whom we have been cooperating for many years. Do not self-medicate, because this will only harm your body. You should definitely seek the advice of your doctor.

Prices for the drug Hetgra

The Hetgra drug is available today to everyone who could not buy the original drug due to the fact that it is very expensive. After all, it is a known fact that generics are always much cheaper than their original drugs. But still, the Hetgra drug was developed on the basis of the same active substance as Tivikay, of which it is an analogue. They are equally effective in blocking viral cell replication. And as soon as the process starts, these viral cells are removed from the body. Hetgra works well with other medications, which is a huge plus. You can compare our prices with the prices of other pharmacies to make sure of the profitable order on our website. With us you can save money that you invest in, so expensive, treatment.

Active substance Dolutegravir

The fact that dolutegravir is in the patient's body will be noticeable after a couple of days. The active ingredient remains active even 5 days after the last dose. It is intended for both monotherapy and complex therapy. Patients rarely report the appearance of negative reactions. Sometimes you may experience the following: a feeling of constant weakness; headache; allergic skin rashes; irritability; insomnia; upset gastrointestinal tract.

Description

The drug Hetgra is sold in the form of hard tablets, which are film coated. One tablet contains 50 mg of dolutegravir and auxiliary components.

Indications Dolutegravir
